Question **1**

Correct

Write a program that prints a simple chessboard.

SOURCE CODE:

```
1 #include <stdio.h>
2 int main()
3 {
4     int t,size;
5     scanf("%d",&t);
6     while(t--){
7         scanf("%d",&size);
8         for(int i=0;i<size;i++){
9             {
10                for(int j=0;j<size;j++){
11                    if((i+j)%2==0)
12                        printf("W");
13                    else
14                        printf("B");
15                }
16                printf("\n");

🚩 Flag question

Let's print a chessboard!

Write a program that takes input:

The first line contains T, the number of test cases

Each test case contains an integer N and also the starting character of the chessboard

SOURCE CODE:

```

1  #include <stdio.h>
2  int main()
3  {
4      int t,n;
5      char ch;
6      scanf("%d",&t);
7      while(t--){
8          scanf("%d %c",&n,&ch);
9          for(int i=0;i<n;i++){
10             for(int j=0;j<n;j++){
11                 if(ch=='W'){
12                     if((i+j)%2==0)
13                         printf("W");
14                     else
15                         printf("B");
